This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 drawn to the first appearing use, a method for treating neurodegenerative disease.

Group II, claim(s) 4-8 drawn to the second method of use for screening treatments for neurodegenerative disease comprising stimulating oxidative stress.

Group III, claim(s) 9-10, drawn to the third method of use in a method for screening treatments of neurodegenerative disease comprising evaluating agents for stimulation of expression of a non-amyloidogenic protein.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the methods differ in reagents, steps, functions and outcomes.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
